THE ASTROPHYSICAL JOURNAL SUPPLEMENT

AUTHOR INDEX

VOLUME 142

2002 SEPTEMBER TO OCTOBER

ALBERT, SIEGHARD. Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

ARISTIDI, E. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

ARNOLD, L. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

ASCHWANDEN, MARKUS J. Analytical Approximations to Hydrostatic Solutions and Scaling Laws of Coronal Loops. *Markus J. Aschwanden & Carolus J. Schrijver.* 142, 269 (2002)

AVILA, R. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

BARTHEL, PETER D. The Radio Properties of Composite LINER/H II Galaxies. *Mercedes E. Filho, Peter D. Barthel, & Luis C. Ho.* 142, 223 (2002)

BORDA, ROBERTO FERNANDEZ. Blue Lines as Chromoshperic Diagnostics: The Al I Lines at 3944 and 3961 Å. *Pablo J. D. Mauas, Roberto Fernandez Borda, & Maria Luisa Luoni.* 142, 285 (2002)

CARQUILLAT, J.-M. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

CHAMPAGNE, ART. The Effects of Thermonuclear Reaction-Rate Variations on Nova Nucleosynthesis: A Sensitivity Study. *Christian Iliadis, Art Champagne, Jordi José, Sumner Starrfield, & Paul Tupper.* 142, 105 (2002)

COX, DONALD P. Analytical Expressions for Spiral Arm Gravitational Potential and Density. *Donald P. Cox & Gilberto C. Gomez.* 142, 261 (2002)

DE LUCIA, FRANK C. Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

DE PROPRIS, ROBERTO. Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

DICKINSON, MARK. Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

DOPITA, M. A. Using Strong Lines to Estimate Abundances in Extragalactic H II Regions and Starburst Galaxies. *L. J. Kewley & M. A. Dopita.* 142, 35 (2002)

DROUIN, BRIAN J. Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

EISENHARDT, PETER R. Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

FABBIANO, G. *Chandra* Observations of "The Antennae" Galaxies (NGC 4038). II. Detection and Analysis of Galaxian X-Ray Sources. *A. Zezas, G. Fabbiano, A. H. Rots, & S. S. Murray.* 142, 239 (2002)

FABER, S. M. See SIMARD, LUC, et al. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip.

FESTOU, M. C. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

FILHO, MERCEDES E. The Radio Properties of Composite LINER/H II Galaxies. *Mercedes E. Filho, Peter D. Barthel, & Luis C. Ho.* 142, 223 (2002)

FREEDMAN, WENDY L. See SEBO, KIM M., et al. The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud.

GERMANY, LISA M. See SEBO, KIM M., et al. The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud.

GIBSON, BRAD K. See SEBO, KIM M., et al. The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud.

GINESTET, N. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

GOMEZ, GILBERTO C. Analytical Expressions for Spiral Arm Gravitational Potential and Density. *Donald P. Cox & Gilberto C. Gomez.* 142, 261 (2002)

GRAHAM, JOHN A. See SEBO, KIM M., et al. The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud.

GRONER, PETER. Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

GUICHARD, J. 1–1.4 Micron Spectral Atlas of Stars. *M. A. Malkan, E. K. Hicks, H. I. Teplitz, I. M. McLean, H. Sugai, & J. Guichard.* 142, 79 (2002)

HERBST, ERIC. Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

HICKS, E. K. 1–1.4 Micron Spectral Atlas of Stars. *M. A. Malkan, E. K. Hicks, H. I. Teplitz, I. M. McLean, H. Sugai, & J. Guichard.* 142, 79 (2002)

HO, LUIS C. The Radio Properties of Composite LINER/H II Galaxies. *Mercedes E. Filho, Peter D. Barthel, & Luis C. Ho.* 142, 223 (2002)

HOLDEN, B. P. Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

ILIADIS, CHRISTIAN. The Effects of Thermonuclear Reaction-Rate Variations on Nova Nucleosynthesis: A Sensitivity Study. *Christian Iliadis, Art Champagne, Jordi José, Sumner Starrfield, & Paul Tupper.* 142, 105 (2002)

ILLINGWORTH, GARTH D. See SIMARD, LUC, et al. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip.

IM, MYUNGSHIN. See SIMARD, LUC, et al. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip.

JOSÉ, JORDI. The Effects of Thermonuclear Reaction-Rate Variations on Nova Nucleosynthesis: A Sensitivity Study. *Christian Iliadis, Art Champagne, Jordi José, Sumner Starrfield, & Paul Tupper.* 142, 105 (2002)

KEWLEY, L. J. Using Strong Lines to Estimate Abundances in Extragalactic H II Regions and Starburst Galaxies. *L. J. Kewley & M. A. Dopita.* 142, 35 (2002)

KOECHLIN, L. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

KOO, DAVID C. See SIMARD, LUC, et al. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip.

LIU, CHARLES T. An H I Optical Atlas of Isolated Galaxies. *D. J. Pisano, Eric M. Wilcots, & Charles T. Liu.* 142, 161 (2002)

LOVAS, FRANK J. Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

LUONI, MARIA LUISA. Blue Lines as Chromoshperic Diagnostics: The Al I Lines at 3944 and 3961 Å. *Pablo J. D. Mauas, Roberto Fernandez Borda, & Maria Luisa Luoni.* 142, 285 (2002)

MADORE, BARRY F. See SEBO, KIM M., et al. The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud.

MALKAN, M. A. 1–1.4 Micron Spectral Atlas of Stars. *M. A. Malkan, E. K. Hicks, H. I. Teplitz, I. M. McLean, H. Sugai, & J. Guichard.* 142, 79 (2002)

MAUAS, PABLO J. D. Blue Lines as Chromoshperic Diagnostics: The Al I Lines at 3944 and 3961 Å. *Pablo J. D. Mauas, Roberto Fernandez Borda, & Maria Luisa Luoni.* 142, 285 (2002)

MCLEAN, I. M. 1–1.4 Micron Spectral Atlas of Stars. *M. A. Malkan, E. K. Hicks, H. I. Teplitz, I. M. McLean, H. Sugai, & J. Guichard.* 142, 79 (2002)

MOREL, S. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

MOULD, JEREMY. See SEBO, KIM M., et al. The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud.

MURRAY, S. S. *Chandra* Observations of "The Antennae" Galaxies (NGC 4038). II. Detection and Analysis of Galaxian X-Ray Sources. *A. Zezas, G. Fabbiano, A. H. Rots, & S. S. Murray.* 142, 239 (2002)

PEARSON, JOHN C. Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

PÉREZ, J.-P. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

PHILLIPS, ANDREW C. See SIMARD, LUC, et al. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip.

PISANO, D. J. An H I Optical Atlas of Isolated Galaxies. *D. J. Pisano, Eric M. Wilcots, & Charles T. Liu.* 142, 161 (2002)

PRIEUR, J. L. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998. *J. L. Prieur, L. Koechlin, N. Ginestet, J.-M. Carquillat, E. Aristidi, M. Scardia, L. Arnold, R. Avila, M. C. Festou, S. Morel, & J.-P. Pérez.* 142, 95 (2002)

PUTMAN, MARY E. See SEBO, KIM M., et al. The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud.

QIAN, S. B. S Equulei: A Low Mass Ratio Algol-Type Eclipsing Binary at the Active Phase of Mass Transfer. *S. B. Qian & L. Y. Zhu.* 142, 139 (2002)

RAWSON, DAYA. See SEBO, KIM M., et al. The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud.

ROTS, A. H. *Chandra* Observations of "The Antennae" Galaxies (NGC 4038). II. Detection and Analysis of Galaxian X-Ray Sources. *A. Zezas, G. Fabbiano, A. H. Rots, & S. S. Murray.* 142, 239 (2002)

SARAJEDINI, VICKI L. See SIMARD, LUC, et al. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip.

SCARDIA, M. See PRIEUR, J. L., et al. Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998.

SEBO, KIM M. The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud. *Kim M. Sebo, Daya Rawson, Jeremy Mould, Barry F. Madore, Mary E. Putman, John A. Graham, Wendy L. Freedman, Brad K. Gibson, & Lisa M. Germany.* 142, 71 (2002)

SIMARD, LUC. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip. *Luc Simard, Christopher N. A. Willmer, Nicole P. Vogt, Vicki L. Sarajedini, Andrew C. Phillips, Benjamin J. Weiner, David C. Koo, Myungshin Im, Garth D. Illingworth, & S. M. Faber.* 142, 1 (2002)

STANFORD, S. A. Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

STARRFIELD, SUMNER. The Effects of Thermonuclear Reaction-Rate Variations on Nova Nucleosynthesis: A Sensitivity Study. *Christian Iliadis, Art Champagne, Jordi José, Sumner Starrfield, & Paul Tupper.* 142, 105 (2002)

SUGAI, H. 1–1.4 Micron Spectral Atlas of Stars. *M. A. Malkan, E. K. Hicks, H. I. Teplitz, I. M. McLean, H. Sugai, & J. Guichard.* 142, 79 (2002)

TEPLITZ, H. I. 1–1.4 Micron Spectral Atlas of Stars. *M. A. Malkan, E. K. Hicks, H. I. Teplitz, I. M. McLean, H. Sugai, & J. Guichard.* 142, 79 (2002)

TUPPER, PAUL. The Effects of Thermonuclear Reaction-Rate Variations on Nova Nucleosynthesis: A Sensitivity Study. *Christian Iliadis, Art Champagne, Jordi José, Sumner Starrfield, & Paul Tupper.* 142, 105 (2002)

VAILLANCOURT, JOHN E. Analysis of the Far-Infrared/Submillimeter Polarization Based on Temperature Maps of Orion. *John E. Vaillancourt.* 142, 53 (2002)

VOGT, NICOLE P. See SIMARD, LUC, et al. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip.

WEINER, BENJAMIN J. See SIMARD, LUC, et al. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip.

WILCOTS, ERIC M. An H I Optical Atlas of Isolated Galaxies. *D. J. Pisano, Eric M. Wilcots, & Charles T. Liu.* 142, 161 (2002)

WILLMER, CHRISTOPHER N. A. See SIMARD, LUC, et al. The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip.

ZEZAS, A. *Chandra* Observations of "The Antennae" Galaxies (NGC 4038). II. Detection and Analysis of Galaxian X-Ray Sources. *A. Zezas, G. Fabbiano, A. H. Rots, & S. S. Murray.* 142, 239 (2002)

ZHU, L. Y. S Equulei: A Low Mass Ratio Algol-Type Eclipsing Binary at the Active Phase of Mass Transfer. *S. B. Qian & L. Y. Zhu.* 142, 139 (2002)

SUBJECT INDEX

VOLUME 142

2002 SEPTEMBER TO OCTOBER

ASTROMETRY

Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998. *J. L. Prieur, L. Koechlin, N. Ginestet, J.-M. Carquillat, E. Aristidi, M. Scardia, L. Arnold, R. Avila, M. C. Festou, S. Morel, & J.-P. Pérez.* 142, 95 (2002)

ATLASES

1–1.4 Micron Spectral Atlas of Stars. *M. A. Malkan, E. K. Hicks, H. I. Teplitz, I. M. McLean, H. Sugai, & J. Guichard.* 142, 79 (2002)

An H I Optical Atlas of Isolated Galaxies. *D. J. Pisano, Eric M. Wilcots, & Charles T. Liu.* 142, 161 (2002)

ATOMIC PROCESSES

Blue Lines as Chromoshperic Diagnostics: The Al I Lines at 3944 and 3961 Å. *Pablo J. D. Mauas, Roberto Fernandez Borda, & Maria Luisa Luoni.* 142, 285 (2002)

COSMOLOGY: DISTANCE SCALE

The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud. *Kim M. Sebo, Daya Rawson, Jeremy Mould, Barry F. Madore, Mary E. Putman, John A. Graham, Wendy L. Freedman, Brad K. Gibson, & Lisa M. Germany.* 142, 71 (2002)

GALAXIES: ABUNDANCES

Using Strong Lines to Estimate Abundances in Extragalactic H II Regions and Starburst Galaxies. *L. J. Kewley & M. A. Dopita.* 142, 35 (2002)

GALAXIES: ACTIVE

The Radio Properties of Composite LINER/H II Galaxies. *Mercedes E. Filho, Peter D. Barthel, & Luis C. Ho.* 142, 223 (2002)

GALAXIES: CLUSTERS: GENERAL

Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

GALAXIES: EVOLUTION

The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip. *Luc Simard, Christopher N. A. Willmer, Nicole P. Vogt, Vicki L. Sarajedini, Andrew C. Phillips, Benjamin J. Weiner, David C. Koo, Myungshin Im, Garth D. Illingworth, & S. M. Faber.* 142, 1 (2002)

Using Strong Lines to Estimate Abundances in Extragalactic H II Regions and Starburst Galaxies. *L. J. Kewley & M. A. Dopita.* 142, 35 (2002)

Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

An H I Optical Atlas of Isolated Galaxies. *D. J. Pisano, Eric M. Wilcots, & Charles T. Liu.* 142, 161 (2002)

GALAXIES: FORMATION

Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

An H I Optical Atlas of Isolated Galaxies. *D. J. Pisano, Eric M. Wilcots, & Charles T. Liu.* 142, 161 (2002)

GALAXIES: FUNDAMENTAL PARAMETERS

The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip. *Luc Simard, Christopher N. A. Willmer, Nicole P. Vogt, Vicki L. Sarajedini, Andrew C. Phillips, Benjamin J. Weiner, David C. Koo, Myungshin Im, Garth D. Illingworth, & S. M. Faber.* 142, 1 (2002)

1–1.4 Micron Spectral Atlas of Stars. *M. A. Malkan, E. K. Hicks, H. I. Teplitz, I. M. McLean, H. Sugai, & J. Guichard.* 142, 79 (2002)

An H I Optical Atlas of Isolated Galaxies. *D. J. Pisano, Eric M. Wilcots, & Charles T. Liu.* 142, 161 (2002)

GALAXIES: HIGH-REDSHIFT

The DEEP Groth Strip Survey II. *Hubble Space Telescope* Structural Parameters of Galaxies in the Groth Strip. *Luc Simard, Christopher N. A. Willmer, Nicole P. Vogt, Vicki L. Sarajedini, Andrew C. Phillips, Benjamin J. Weiner, David C. Koo, Myungshin Im, Garth D. Illingworth, & S. M. Faber.* 142, 1 (2002)

Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

GALAXIES: INDIVIDUAL

NGC Number: NGC 4038/9

Chandra Observations of "The Antennae" Galaxies (NGC 4038). II. Detection and Analysis of Galaxian X-Ray Sources. *A. Zezas, G. Fabbiano, A. H. Rots, & S. S. Murray.* 142, 239 (2002)

GALAXIES: INTERACTIONS

Chandra Observations of "The Antennae" Galaxies (NGC 4038). II. Detection and Analysis of Galaxian X-Ray Sources. *A. Zezas, G. Fabbiano, A. H. Rots, & S. S. Murray.* 142, 239 (2002)

GALAXIES: ISM

An H I Optical Atlas of Isolated Galaxies. *D. J. Pisano, Eric M. Wilcots, & Charles T. Liu.* 142, 161 (2002)

GALAXIES: MAGELLANIC CLOUDS

The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud. *Kim M. Sebo, Daya Rawson, Jeremy Mould, Barry F. Madore, Mary E. Putman, John A. Graham, Wendy L. Freedman, Brad K. Gibson, & Lisa M. Germany.* 142, 71 (2002)

GALAXIES: NUCLEI

The Radio Properties of Composite LINER/H II Galaxies. *Mercedes E. Filho, Peter D. Barthel, & Luis C. Ho.* 142, 223 (2002)

GALAXIES: PECULIAR

Chandra Observations of "The Antennae" Galaxies (NGC 4038). II. Detection and Analysis of Galaxian X-Ray Sources. *A. Zezas, G. Fabbiano, A. H. Rots, & S. S. Murray.* 142, 239 (2002)

GALAXIES: PHOTOMETRY

Optical and Near-Infrared Photometry of Distant Galaxy Clusters. *S. A. Stanford, Peter R. Eisenhardt, Mark Dickinson, B. P. Holden, & Roberto De Propris.* 142, 153 (2002)

GALAXIES: SPIRAL

An H I Optical Atlas of Isolated Galaxies. *D. J. Pisano, Eric M. Wilcots, & Charles T. Liu.* 142, 161 (2002)

Analytical Expressions for Spiral Arm Gravitational Potential and Density. *Donald P. Cox & Gilberto C. Gomez.* 142, 261 (2002)

GALAXIES: STARBURST

Using Strong Lines to Estimate Abundances in Extragalactic H II Regions and Starburst Galaxies. *L. J. Kewley & M. A. Dopita.* 142, 35 (2002)

GALAXIES: STRUCTURE

Analytical Expressions for Spiral Arm Gravitational Potential and Density. *Donald P. Cox & Gilberto C. Gomez.* 142, 261 (2002)

GALAXY: STRUCTURE

Analytical Expressions for Spiral Arm Gravitational Potential and Density. *Donald P. Cox & Gilberto C. Gomez.* 142, 261 (2002)

HYDRODYNAMICS

Analytical Expressions for Spiral Arm Gravitational Potential and Density. *Donald P. Cox & Gilberto C. Gomez.* 142, 261 (2002)

Analytical Approximations to Hydrostatic Solutions and Scaling Laws of Coronal Loops. *Markus J. Aschwanden & Carolus J. Schrijver.* 142, 269 (2002)

INFRARED: ISM

Analysis of the Far-Infrared/Submillimeter Polarization Based on Temperature Maps of Orion. *John E. Vaillancourt.* 142, 53 (2002)

INFRARED: STARS

1–1.4 Micron Spectral Atlas of Stars. *M. A. Malkan, E. K. Hicks, H. I. Teplitz, I. M. McLean, H. Sugai, & J. Guichard.* 142, 79 (2002)

ISM: ABUNDANCES

Using Strong Lines to Estimate Abundances in Extragalactic H II Regions and Starburst Galaxies. *L. J. Kewley & M. A. Dopita.* 142, 35 (2002)

ISM: DUST, EXTINCTION

Analysis of the Far-Infrared/Submillimeter Polarization Based on Temperature Maps of Orion. *John E. Vaillancourt.* 142, 53 (2002)

ISM: INDIVIDUAL

Alphanumeric: OMC-1

Analysis of the Far-Infrared/Submillimeter Polarization Based on Temperature Maps of Orion. *John E. Vaillancourt.* 142, 53 (2002)

ISM: MOLECULES

Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

LINE: FORMATION

Blue Lines as Chromoshperic Diagnostics: The Al I Lines at 3944 and 3961 Å. *Pablo J. D. Mauas, Roberto Fernandez Borda, & Maria Luisa Luoni.* 142, 285 (2002)

LINE: PROFILES

Blue Lines as Chromoshperic Diagnostics: The Al I Lines at 3944 and 3961 Å. *Pablo J. D. Mauas, Roberto Fernandez Borda, & Maria Luisa Luoni.* 142, 285 (2002)

METHODS: DATA ANALYSIS

Analysis of the Far-Infrared/Submillimeter Polarization Based on Temperature Maps of Orion. *John E. Vaillancourt.* 142, 53 (2002)

METHODS: LABORATORY

Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

MOLECULAR DATA

Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

MOLECULAR PROCESSES

Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

NUCLEAR REACTIONS, NUCLEOSYNTHESIS, ABUNDANCES

The Effects of Thermonuclear Reaction-Rate Variations on Nova Nucleosynthesis: A Sensitivity Study. *Christian Iliadis, Art Champagne, Jordi José, Sumner Starrfield, & Paul Tupper.* 142, 105 (2002)

POLARIZATION

Analysis of the Far-Infrared/Submillimeter Polarization Based on Temperature Maps of Orion. *John E. Vaillancourt.* 142, 53 (2002)

RADIO CONTINUUM: GALAXIES

The Radio Properties of Composite LINER/H II Galaxies. *Mercedes E. Filho, Peter D. Barthel, & Luis C. Ho.* 142, 223 (2002)

RADIO LINES: ISM

Acetone: Laboratory Assignments and Predictions through 620 GHz for the Vibrational-Torsional Ground State. *Peter Groner, Sieghard Albert, Eric Herbst, Frank C. De Lucia, Frank J. Lovas, Brian J. Drouin, & John C. Pearson.* 142, 145 (2002)

STARS: ABUNDANCES

The Effects of Thermonuclear Reaction-Rate Variations on Nova Nucleosynthesis: A Sensitivity Study. *Christian Iliadis, Art Champagne, Jordi José, Sumner Starrfield, & Paul Tupper.* 142, 105 (2002)

STARS: BINARIES: CLOSE

S Equulei: A Low Mass Ratio Algol-Type Eclipsing Binary at the Active Phase of Mass Transfer. *S. B. Qian & L. Y. Zhu.* 142, 139 (2002)

STARS: BINARIES: ECLIPSING

S Equulei: A Low Mass Ratio Algol-Type Eclipsing Binary at the Active Phase of Mass Transfer. *S. B. Qian & L. Y. Zhu.* 142, 139 (2002)

STARS: BINARIES: VISUAL

Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998. *J. L. Prieur, L. Koechlin, N. Ginestet, J.-M. Carquillat, E. Aristidi, M. Scardia, L. Arnold, R. Avila, M. C. Festou, S. Morel, & J.-P. Pérez.* 142, 95 (2002)

STARS: CHROMOSPHERES

Analytical Approximations to Hydrostatic Solutions and Scaling Laws of Coronal Loops. *Markus J. Aschwanden & Carolus J. Schrijver.* 142, 269 (2002)

STARS: EVOLUTION

S Equulei: A Low Mass Ratio Algol-Type Eclipsing Binary at the Active Phase of Mass Transfer. *S. B. Qian & L. Y. Zhu.* 142, 139 (2002)

STARS: FUNDAMENTAL PARAMETERS

Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998. *J. L. Prieur, L. Koechlin, N. Ginestet, J.-M. Carquillat, E. Aristidi, M. Scardia, L. Arnold, R. Avila, M. C. Festou, S. Morel, & J.-P. Pérez.* 142, 95 (2002)

STARS: INDIVIDUAL

Constellation Name: S Equulei

S Equulei: A Low Mass Ratio Algol-Type Eclipsing Binary at the Active Phase of Mass Transfer. *S. B. Qian & L. Y. Zhu.* 142, 139 (2002)

STARS: NOVAE, CATACLYSMIC VARIABLES

The Effects of Thermonuclear Reaction-Rate Variations on Nova Nucleosynthesis: A Sensitivity Study. *Christian Iliadis, Art Champagne, Jordi José, Sumner Starrfield, & Paul Tupper.* 142, 105 (2002)

STARS: VARIABLES: CEPHEIDS

The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud. *Kim M. Sebo, Daya Rawson, Jeremy Mould, Barry F. Madore, Mary E. Putman, John A. Graham, Wendy L. Freedman, Brad K. Gibson, & Lisa M. Germany.* 142, 71 (2002)

STARS: VARIABLES: OTHER

S Equulei: A Low Mass Ratio Algol-Type Eclipsing Binary at the Active Phase of Mass Transfer. *S. B. Qian & L. Y. Zhu.* 142, 139 (2002)

SUBMILLIMETER

Analysis of the Far-Infrared/Submillimeter Polarization Based on Temperature Maps of Orion. *John E. Vaillancourt.* 142, 53 (2002)

SUN: CHROMOSPHERE

Blue Lines as Chromoshperic Diagnostics: The Al I Lines at 3944 and 3961 Å. *Pablo J. D. Mauas, Roberto Fernandez Borda, & Maria Luisa Luoni.* 142, 285 (2002)

SUN: CORONA

Analytical Approximations to Hydrostatic Solutions and Scaling Laws of Coronal Loops. *Markus J. Aschwanden & Carolus J. Schrijver.* 142, 269 (2002)

TECHNIQUES: HIGH ANGULAR RESOLUTION

Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998. *J. L. Prieur, L. Koechlin, N. Ginestet, J.-M. Carquillat, E. Aristidi, M. Scardia, L. Arnold, R. Avila, M. C. Festou, S. Morel, & J.-P. Pérez.* 142, 95 (2002)

TECHNIQUES: INTERFEROMETRIC

Speckle Observations of Composite Spectrum Stars with PISCO in 1993–1998. *J. L. Prieur, L. Koechlin, N. Ginestet, J.-M. Carquillat, E. Aristidi, M. Scardia, L. Arnold, R. Avila, M. C. Festou, S. Morel, & J.-P. Pérez.* 142, 95 (2002)

TECHNIQUES: PHOTOMETRIC

The Cepheid Period-Luminosity Relation in the Large Magellanic Cloud. *Kim M. Sebo, Daya Rawson, Jeremy Mould, Barry F. Madore, Mary E. Putman, John A. Graham, Wendy L. Freedman, Brad K. Gibson, & Lisa M. Germany.* 142, 71 (2002)

X-RAYS: GALAXIES

Chandra Observations of "The Antennae" Galaxies (NGC 4038). II. Detection and Analysis of Galaxian X-Ray Sources. *A. Zezas, G. Fabbiano, A. H. Rots, & S. S. Murray.* 142, 239 (2002)
